### **DETAILED ACTION**

1. This action is responsive to the Applicant's communication filed on 06/28/2007.
2. Claims 16, 23, 37 have been amended, and claims 28-36 canceled.
3. Claims 1-27, 37 are pending and presented for examination.

#### ***Continued Examination Under 37 CFR 1.114***

4. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 28, 2007 has been entered.

#### ***Claim Rejections - 35 USC § 101***

5. Applicant's arguments and amendment filed June 28, 2007 regarding claims 16-27, and 37 is persuasive. This amendment overcomes the rejection under 35 USC 101 on claims 16-27, and 37.

#### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined

Art Unit: 2165

application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-15 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-40 of copending Application No. 09/455,877. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim(s) 2 and 17 (in combination of claims 1 and 16) of application No. 09/455,877 contain(s) every element of claim(s) 1 and 6 of the instant application and thus anticipate claim(s) 1 and 6 of the instant application. It is noted, however, claims 1 and 6 of the instant application 10/677,113 are broader than claims 2 and 17 of copending application No.

Art Unit: 2165

09/455,877. Claim(s) of the instant application therefore is/are not patently distinct from the earlier application claim(s) and as such is/are unpatentable over obvious-type double patenting.

“A later patent/application claim is not patentably distinct from an earlier patent/application claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within the genus).” ELI LILLY AND COMPANY v BARR LABORATORIES, INC., United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC ( DECIDED: May 30, 2001).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The dependent claims 2-5, 7-15 of the instant application included in the statement of rejection but not specifically addressed in the body of the rejection have inherited the deficiencies of their parent claims and have not resolved the deficiencies. Therefore, they are rejected directly or indirectly based on the same rationale as applied to their parent claims above.

#### ***Allowable Subject Matter***

8. The present application has been thoroughly reviewed, upon searching a variety of databases; the examiner respectfully submits that claims 16-27, 37 are allowed in light of Applicants' arguments and in light of prior art made of record.

***Prior Art Made of Record***

9. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. U.S. patents and U.S. patent application publications will not be supplied with Office actions. Examiners advises the Applicant that the cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site ([www.uspto.gov](http://www.uspto.gov)), from the Office of Public Records and from commercial sources.
